

**Plastic Coatings Ltd**

**CONFLICTING MATERIALS & REACH Policy**

**Version 001\_January 2024\_R. Allen**

Plastic Coatings Ltd are a coating materials applicator. We do not manufacture nor do we hold design responsibility for the coating materials that we apply.

Therefore; our core business is the application of proprietary surface coatings and treatments, we are a “downstream user” and we do not directly import any chemicals or Substances of Very High Concern.

We work with our suppliers to ensure that all of the materials we purchase comply with REACH and any other restrictions in place at the time of purchase.

To the best of our knowledge at this time, we can confirm that this is the case and that we have not been advised of any problems with future supply, this includes SVHC’s within the meaning of REACH.

We are committed to ensuring that our material suppliers are complying with and continue to comply with the regulations. Our suppliers make a commitment to this as part of our Supplier Approval Process, this is a key element of our Business Management System and therefore it is regularly audited by a third parties as part of our ISO/TS 16949, ISO 14001 and ISO 45001 certification processes.
